

## **AMBULANCE CALLS FOR STUDENTS**

### **Background**

The District believes that when it is necessary for an ambulance to be called to transport ill or injured students from a school function, the cost should be paid for by the District if it is not covered by an insurance policy held by the parents.

The District will authorize payment of the cost to employ an ambulance service for students where the need for the service arises during a school function.

### **Procedures**

1. The ambulance must have been called at the direction of the staff member in charge of the function.
2. In the event that the ambulance service can be paid for under an insurance plan such as extended health benefit plan of the parent, every effort shall be made by the District Office to have the service paid for by the insurance plan.
